

IMDSL LASER FOR PLDD

Advantages of PLDD

- Day Care Procedure
- No General Anesthesia
- Minimally Invasive
- Excellent Patient Outcome
- Minimal recovery time
- Minimal scar tissue formation

Wavelength -
1470nm/980nm/650nm

Aqua Plus/ Trident -P

PER CUTANEOUS
LASER DISC
DECOMPRESSION

Model Name	Aqua Plus	Trident - P
Wavelength	1470nm + 650nm	980nm + 1470nm
Max. Power	15.2W	15W+ 15W
Magic pulse technology	No	Yes
Aiming Beam	635 nm	
Fiber	Bare Fiber	
Mode	CW/Pulse	
Interlock key	Yes	
Fiber connector	SM905A	

PLDD - A minimally invasive procedures for managing radicular spine pain. PLDD procedures are performed under local anesthesia. PLDD minimises the possibility of damaging the dural sac when operating on higher segments or spinal roots.
